SUMMARY

A developer with experience building web applications from scratch across multiple software language stacks. A driven military veteran with strong decision making and leadership skills. Eager to combine burgeoning software knowledge and strong customer focused skills to impact technology teams.

EDUCATION

CODING DOJO

2020 | Full Stack Web Development Coding Bootcamp

- 16 weeks intensive coding bootcamp: 1000+ hrs of full stack web development
- Constructed full-Stack web applications in 5 hours or less using only wireframes

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, HTML5, CSS **Frameworks/Libraries:** Flask, Bootstrap, jQuery, React, Express, Spring MVC, Spring Boot **Databases:** MySQL, MongoDB **Version Control Systems:** Git, Github

Technical Work Experience

Fast Way | [fastway.equipment](https://www.fastwayequipment.com/) | Full Stack Engineer

2021 - Present - Remote

A Bay Area company that provides consultation, coaching, tailored equipment to the hydroponic farming industry.

- Executed code deliverables in a SCRUM/Agile environment focused on building internal software across React, CSS, JavaScript and Node.js that allows company employees to adequately perform daily operations.
- Using Node.js I established relationships in MongoDB to effectively allow CRUD operations throughout the full stack.
- **Technologies:** Node.js, React, Material UI, Git, Github, JavaScript, CSS, MongoDB, JIRA

PROJECTS

Construction Website | [github demo](https://github.com/ernestmummey/construction-website)

A responsive website that markets and enables customers of a construction company to review past projects, the services they offer, and a form to contact the company.

- Collaborated remotely on a team of two via github to iterate and build an end to end website using React framework. Owned backend development connecting the form to a Java backend and Mysql database to gather user data.
- Communicated with the owner of the construction company(client) to plan and define the analysis of the project for a prototype design and agile development.
- **Technologies:** Node.js, React, Java, Spring MVC, Spring Boot, Bootstrap, Mysql, Git, Github

EXPERIENCE

UNITED STATES ARMY - Team Leader

2011 - 2016 - Fort Bragg, NC

- Led and mentored a challenging team of 3 to 5 people, instructed readiness training and provided meaningful advice that ensured each team member was prepared to confidently make decisive decisions across operational goals. Leading to 7 team members being successfully promoted to team leaders.
- Earned multiple achievements awards (Army Commendation Medal, Army Presidential Unit Citation, Army Achievement Medal) for exemplary service, heroism, and meritorious achievements in high stress and often hostile environments throughout a combat deployment overseas
- Earned 2 early promotions for quickly learning job duties and superior roles to effectively lead and advise an adept team.
